

KS3

Computer Science Year 7 Curriculum Overview Goals

NOTE: The curriculum overview is thoughtfully crafted to offer flexibility, enabling smooth transitions between terms. This adaptability is designed to seamlessly accommodate any surplus content from one term's Scheme of Work (SOW) to another, ensuring a comprehensive and uninterrupted learning experience for students. Moreover, this approach considers the possibility of missed lessons due to whole-school events, contributing to a dynamic and responsive educational framework. By embracing this flexible structure, we aim to foster a resilient and agile learning environment that can readily adapt to unforeseen circumstances, providing students with a robust and holistic educational journey.

Autumn Half Term 1	Autumn Half Term 2	Spring Half Term 1	Spring Half Term 2	Summer Half Term 1	Summer Half Term 2
Digital Citizenship School Systems <ul style="list-style-type: none"> Logging onto network create secure password School systems - Teams, Office 365, Classcharts Mini Project – Digital Literacy Create E-safety presentation on office 365 access at home to add personal image and email <ul style="list-style-type: none"> File management – home area folders/ subfolders/files Creating folders and files Finding, saving and renaming images Inserting images into all about me presentation 	<ul style="list-style-type: none"> All about me presentation Using Computers Safely Effectively Responsibly <ul style="list-style-type: none"> Social networking Keeping your data safe/how to report--- Using email cc, bcc, attachments Sending emails Data Representation <ul style="list-style-type: none"> Binary 	<ul style="list-style-type: none"> Denary Binary addition Revision Summative Assessment Feedback and NOW Artificial Intelligence and Machine Learning <ul style="list-style-type: none"> What is Ai Machine Learning Ethics an AI Ethics and China 	<ul style="list-style-type: none"> Pattern recognition with images linked to binary Turing test Understanding Computers and Data Representation <ul style="list-style-type: none"> Elements of a computer, input and output devices CPU Storage devices 	Mini Project Block programming Microbits/Edison Robots and create a presentation with video of programmed Microbit/Robot Block Programming - Microbits Microbits to write programs on: <ul style="list-style-type: none"> Sequence Selection Selection with count Decomposition/Function Revision lesson Summative Assessment Feedback and NOW 	Block Programming - Edison Robots <ul style="list-style-type: none"> Design a maze Code to navigate maze Textual Python Programming <ul style="list-style-type: none"> IDE, syntax Sequence, print function Sequence, variable, input function
