

1A The challenge of natural hazards: **Natural hazards**

P1 I can outline the different types of natural hazard			
P2 I can explain how external factors can affect hazard risk			

1A The challenge of natural hazards: **Tectonic hazards**

P3 I can outline the global distribution of tectonic hazards			
P4 I can explain the global distribution of tectonic hazards			
P5 I can describe the features of different types of tectonic plate boundary			
P6 I can explain how tectonic hazards arise as a result of physical processes at plate boundaries			
P7 I can describe the impacts of tectonic events in an LIC and an HIC			
P8 I can explain the impacts of tectonic events in an LIC and an HIC			
P9 I can compare the impact of tectonic events between an LIC and an HIC			
P10 I can explain why areas prone to tectonic hazards are often populated			
P11 I can describe a range of ways to reduce the risks from tectonic hazard events			
P12 I can explain how prediction and preparation can moderate the risks and effects of tectonic hazards			
P13 I can suggest ways in which hazard management techniques can reduce the risks of future tectonic hazards			

1A The challenge of natural hazards: **Tropical storms**

P14 I can describe the global distribution of tropical storms			
P15 I can describe the structure, features and formation of tropical storms			
P16 I can explain how tropical storms might be affected by climate change			
P17 I can describe the impacts of a tropical storm			
P18 I can explain the impact of a tropical storm			
P19 I can describe a range of ways to reduce the risks from tropical storms			
P20 I can explain how preparation and management strategies can moderate the risks and impacts of future tropical storms			
P21 I can suggest ways in which preparation and management techniques can reduce the risks of future tropical storms			

1A The challenge of natural hazards: Extreme weather in the UK

P22 I can describe types of weather hazard faced by the UK			
P23 I can explain the causes of an extreme weather event in the UK			
P24 I can explain the impacts of a recent extreme weather event in the UK			
P25 I can discuss how management strategies can reduce the risks and impacts of extreme weather in the UK			
P26 I can suggest ways in which weather is becoming more extreme in the UK			

1A The challenge of natural hazards: Climate and climate change

P27 I can outline the historical evidence for climate change			
P28 I can explain the natural factors behind climate change			
P29 I can explain the human factors behind climate change			
P30 I can describe mitigation and adaptation strategies for managing climate change			
P31 I can discuss the effectiveness of mitigation and adaptation strategies in managing climate change
