

NEA: Non Examined Assessment : NEA: Non Examined Assessment

N1 I can give an overview (literature review) of the background reading that I have undertaken to prepare for my investigation.			
N2 I can state the aims and objectives of my investigation (research question and sub hypotheses).			
N3 I can describe and justify the primary and secondary sources of data that I will collect.			
N4 I can discuss the different sampling procedures that I have considered in planning for my data collection.			
N5 I can outline the health and safety considerations related to my data collection (Hazard, Risk, Reduction).			
N6 I can collect primary data in the field			
N7 I can collect secondary data from appropriate sources.			
N8 I can process and present my data using relevant graphical techniques.			
N9 I can process and present my data using relevant cartographic techniques.			
N10 I can analyse my data, making use of appropriate statistical techniques where relevant.			
N11 I can draw conclusions and relate them back to the original aims and objectives of my investigation.			
N12 I can link my conclusions to the place studied and the ideas for the basis of the enquiry			
N13 I can evaluate the success of all stages of the enquiry			
N14 I can sequence my work into an effective order			
N15 I can reference my work effectively			
N16 I can summarise my investigation and present this as a synopsis.
