

Hazards : Hazard Classification

H1 I can define hazards in a geographical context			
H2 I can explain the structure of the Earth			

Hazards : Plate Tectonics

H3 I can explain the theory of plate tectonics and development			
H4 I can identify and explain the features of constructive plate margins			
H5 I can identify and explain the features of destructive margins (subduction and collision)			
H6 I can identify and explain the features of conservative margins			

Hazards : Volcanic Hazards

H7 I can explain the location and formation of volcanic hotspots			
H8 I can describe and explain the distribution and prediction of volcanic activity			
H9 I can give the impacts of volcanic activity			
H10 I can give the human responses to volcanic activity			
H11 I can examine a comparison case study of eruption and effects.			

Hazards : Seismic Hazards

H12 I can explain the causes of earthquakes and tsunamis			
H13 I can describe and explain the distribution and prediction of earthquakes			
H14 I can give the impacts of seismic activity			
H15 I can give the human responses to seismic activity			
H16 I can examine a comparison case study of seismic events and effects.			
H17 I can give the causes, effects and responses to a multi-hazard environment			

Hazards : Storm Hazards

H18 I can explain the nature of storm hazards			
H19 I can use a case study to explain the impacts of storm hazards			

Hazards : Wildfire Hazards

H20 I can explain the causes and effects of fires in nature			
H21 I can use a case study to explain the impacts of wildfire hazards
